

Hi there,

We are the fortunate parents of autistic child to meet with Dr. Kavita Chandak for the treatment.

Our child diagnosed as having Autism at his/her early age, say between 18-24 months.

We visited various doctors and went for therapies like ABA, cognitive therapy, speech therapy etc without significant change.

When came to know about Dr. Chandak and her consistent work with Homeopathy in the field of Autism, we consulted her.

We were already hopeless but thought to give a chance to Homeopathy as it is non toxic and safe branch of medicine without any side effects.

We met Dr. Kavita Chandak with our child. She took detailed history since the pregnancy time/ foetal hood along with our family history for any major illnesses. She explained us why our child landed in Autism when me and my wife are absolutely normal. We were really curious to know the reason but no doctor yet explained so well.

We started Dr. Chandak's treatment and got more than 70% positive changes in our child in speech, sentence making, perception, commands following, eye contact, balancing, reduced jumping, less aggression and somewhat friendly behaviour at home as well in school.

She did ask about history of vaccination and family environment during the pregnancy period.

We do not expect our child to be 100% normal like his peers. This much recovery has made us hopeful and we trust our doctor that with time she will provide us better results as much possible.

Her international work and seminar to teach homeopaths how to handle Autism, ADHD and other psychiatric disorders gave us a lot hope! We got results too!

Dr. Chandak, recently published a research paper at 76th Homeopathic World Congress held at Bogota, Colombia in October 2024 about the 4C method to deal with Autism successfully.

This is not just our observation but we found positive changes in psychology analysis and CARS test.

We are fortunate to meet Dr. Kavita Chandak. Her work, dedication and determination must get acknowledgement from such prestigious platform Golden Book!

Your recognition will make her known to those parents who are searching a ray of hope!

Help them!

We thank Dr. Kavita Chandak for lighting our lives with our child's recovery from Autism.
