

We met Dr. Kavita Chandak mam for our son, Shaurya Balpande, a diagnosed case of Autism in August 2021.

We shared his psychological analysis reports with mam. He used to jump thousands of times per day, no speech. Command following was zero. He was not able to sit at one place, very restless. No fear during thunderstorm where normally other children would have felt the feeling of fear. We could not carry him anywhere as he used to bang his head, injuring others, shouting, biting and destructive.

Chandak mam listened the case carefully. She took our interview for an hour. She thoroughly asked about my mental/emotional status during pregnancy, about any major illness in family history and his present chief complaints.

She assured us that Homeopathy could definitely help the child with autism.

We were told, as autism is incurable. We were taking various therapies for the same without any benefit.

It was so embarrassing to attend public functions with Shaurya. Complaints from the schoolteacher was again a burden to tolerate.

We gradually started to witness the change in our son after Dr. Chandak mam started medicines in August 2021.

In February 2022, the CARS test and psychological analyst's report confirmed No to Minimal Autism score!

The analyst was so surprised to see the report but I could not tell him that it is the result of Homeopathic treatment!

Now our life quality is improved. We are going out, attending family functions. Shaurya is able to talk, his speech is clear. I am fed up of his curiosity. He teases others and knows how to defend himself. He understands money and knows its importance in day-to-day life. He is not jumping, can unbutton his pants, telling about persisting at one place, concentration is much better and his school teacher is no more a burden for me!

Thanks to Dr. Kavita Chandak mam for her knowledge and experience in handling such cases. It is not easy to trust anyone and give him the command of your child's life.
